Committee during the December 2016 meeting discussed at length the WIOA MOU currently under discussion for completion this fiscal year. Specific discussion was around who the partners are, the schedule and content of meetings, and the details that must be included in the final documents. Current activities include learning the workforce services of all partners and determining how they fit together. In addition, the committee discussed the need for additional training dollars to ensure that shared customers can receive training they need to move in to the many open jobs currently available in the region. The group also discussed technology needs and the possibility of a crosswalk that will allow different software packages to communicate with each other across agencies, allowing for simplicity in service customers with multiple needs. The committee was asked to think about how the WIB might develop a financial plan around

shared costs that address the issues
in questions.
