

AMP IT UP

Amp It Up is a program to introduce Advanced Manufacturing and STEM to middle and high school students, help them see how their course work is applied in these industries, increase their science and math interest and skills, perform better on MCAS and standardized testing, and potentially consider Advanced Manufacturing and STEM career options.

The North Shore WIB matches local area high school teachers with advanced manufacturers for day long externships to show the practical application of math and science in the work place. The teachers attend two half day curriculum development sessions and then develop classroom activities and curriculum relating to this experience.

2018 Amp it Up Companies and Teachers	
Company	Teacher(s)
General Electric	Lynn Classical (2)
Medtronic	Lynn English and Lynn Vocational Technical Institute
